1. Which are the two common types of supervised learning? (Choose two) Regression

Grade 100%

⊘ Correct

Regression predicts a number among potentially infinitely possible numbers.

Clustering

Classification

2.

⊘ Correct

Classification predicts from among a limited set of categories (also called classes). These could be a limited set of numbers or labels such as "cat" or "dog".

Which of these is a type of unsupervised learning?

Classification

Clustering

Regression

⊘ Correct

Clustering groups data into groups or clusters based on how similar each item (such as a hospital patient
